

The Alexandra Yeo Fellowship in Thrombosis & Hemostasis

The University of Toronto, Division of Hematology is accepting applications for a 2 year academic combined fellowship program in thrombosis and hemostasis. This innovative program offers a unique breadth and depth of clinical exposure in arterial and venous thrombosis, hemophilia and other inherited coagulation factor deficiencies, platelet disorders, and coagulation laboratory diagnosis. The University, with its affiliated academic health sciences centres, is home to the largest clinical programs in Canada as well as a wealth of clinical and translational research opportunities.

The fellow is expected to enrol in a funded Master's course if not previously undertaken postgraduate studies. This should be in alignment with their academic focus, i.e. clinical epidemiology/health research methodology, medical education, public health, or quality improvement. At least 60% of time is protected for academic activities with well-structured mentorship provided in all areas.

Interested residents should submit their CV, including 3 named referees, with covering personal statement by email to richard.ward@uhn.ca by February 28th 2014 for a start date of July 1st, 2014. Any enquiries may also be directed to Dr. Richard Ward, Benign Hematology, University Health Network.
