

## Hematologists

### **Division of Hematology, Department of Medicine, The Ottawa Hospital and the Faculty of Medicine, University of Ottawa**

The Division of Hematology is experiencing substantial clinical and academic growth. We seek hematologists to join in our expansion and to lead in clinical care, education and/or research in Malignant Hematology and Benign Hematology

Our Benign Hematology and Malignant Hematology programs are well-defined and successful clinical and research groups, with robust and expanding clinical practices. In addition to providing excellent patient care, candidates will be involved with teaching students, residents, and fellows, and would have a focus of interest in education, research or administration.

The city of Ottawa, with its 1.2 million inhabitants, has the highest average income and education of any city in Canada and provides a thriving multicultural and bilingual environment. Numerous cultural activities as well as readily accessible sporting and natural resources make it an ideal family and healthy living environment.

#### Qualifications

Hematologist at an Assistant Professor level or higher; Bilingualism (French and English) an asset; Masters in Epidemiology or Education an asset; Eligible for licensure in Ontario.

All qualified candidates are encouraged to apply; however, Canadian citizens and permanent residents will be given priority.

Kindly forward a letter outlining your interest, 3 references and a CV to Dr. Marc Rodger, Chief, Division of Hematology, TOH and University of Ottawa, Box 201, 501 Smyth Rd, Ottawa Ontario K1H 8L6 or to [mrodger@ohri.ca](mailto:mrodger@ohri.ca) by September 1st, 2016
