

Thunder Bay Regional Health Sciences Centre

Complex Malignant Hematologist

Thunder Bay Regional Health Sciences Centre (TBRHSC) seeking a complex malignant hematologist-oncologist to join our growing and dynamic multidisciplinary team. The successful candidate will be involved in direct care of patients with acute leukemia, including induction and consolidation, post-BMT transplant care, multiple myeloma and lymphoma patients who require autologous stem cell transplantation. The candidate will also work closely with leadership and administration to plan and build an acute leukemia program over the next few years. Participation in call coverage for the hematology service will be required (including urgent benign and malignant issues). In addition to clinical care and administration, the candidate will be involved in research and training. Qualified candidates with

exceptional patient care and teamwork skills as well as a desire to be actively involved in program development are encouraged to apply. Candidates must be comfortable with a position that will evolve as the program continues to grow.

Qualifications and Position Requirements

Candidates must be certified in Hematology by the Royal College of Physicians and Surgeons of Canada (or equivalent), have an MD, hold an independent license with the College of Physicians and Surgeons of Ontario (CPSO) and have additional training in Leukemia and/or Bone Marrow Transplants. All candidates must be either Canadian citizens or permanent residents.

Serving Northwestern Ontario

Serving Northwestern Ontario: Thunder Bay Regional Health Sciences Centre serves Northwestern Ontario from east of White River to the Manitoba border in the west and from Hudson Bay in the north to the United States border in the south. Thunder Bay Regional Health Sciences Centre is the only acute care hospital in the City of Thunder Bay and operates one of the busiest emergency departments in Canada and the only one in the City. Ours is also the only tertiary hospital in Northwestern Ontario and a regional referral centre for 10 smaller regional acute care hospitals. We are a unique region with unique gaps in health care.

Research Will Transform the Future of Health Care

The Thunder Bay Regional Health Research Institute is distinct. Until very recently, health research facilities of this calibre would be housed in a major metropolitan centre. Indeed, our scientists found that Thunder Bay's size and status as a regional hub has tremendous advantages, particularly access to collaborators. We are able to focus our research to address the health care challenges unique to our region.

Academics & Learning

Learners play an important role at our Hospital. We are the teaching hospital of choice for learners from the Northern Ontario School of Medicine, Lakehead University, Confederation College, and other partnering academic institutions. We are an academic health sciences centre, committed to teaching the next generation of health care providers. Our new Simulation Centre allows practitioners to practice and expand their knowledge and skills within a safe and controlled environment.

Living in Thunder Bay

In addition to working at a worldclass academic health care facility, you also have the city of Thunder Bay and surrounding area at your back door. We are known for our access to the outdoors: hiking, fishing, camping, snowshoeing, skiing; we have it all! For more information, please visit:
