

Hematologist Full Time Position

July 2021

Southlake Regional Health Centre

Newmarket, ON

A full time hematology position with a focus on benign hematology will be available at Southlake from July 2021.

Southlake is a large 500+ bed full service community hospital with regional programs including cardiovascular medicine and surgery, thoracic surgery, and the Stronach Regional Cancer Centre.

This position is hospital-based with clinics run through the ambulatory day care medicine clinics. The clinics include general hematology referrals and thrombosis/hemostasis. There are 2 other hematologists with a focus on benign hematology as well working in these clinics. There are an additional 4 hematologists working at the Stronach Cancer Centre who also provide some on-call support. There is a need and desire to build and grow the thrombosis/ hemostasis program which provides support across all hospital clinical programs. The hospital has a large internist/hospitalist support system that provides primary care for all inpatients. All subspecialties are well represented including infectious disease, respirology, and ICU. Pathology and laboratory support is available.

Full administrative and office support will be provided.

We are a collaborative and supportive group looking forward to the addition of yet another member of our team.

All enquiries can be made directly to Dr. Peter Anglin at panglin@southlakeregional.org.

This position will be available from July 2021.

(Please note this is not a 1.0 FTE APP position through CCO)
